

CAMEL VALLEY SUSTAINABILITY POLICY

We endeavor to:

- Produce wine in an economically viable way for generations to come
- Maintain the highest level of grape and wine quality
- Implement cultural practices and solve wine production problems in a way that minimises the use of off-farm inputs, such as agricultural chemicals and fertilisers, with the aim of protecting workers, the environment, and society at large
- Promote and maintain biological diversity in the vineyard
- Promote and maintain soil health, fertility, and stability
- Reduce greenhouse gas emissions
- Manage water and energy use more efficiently, and reduce and recycle waste
- Engage in aspects of social responsibility
- Have a safe and healthy working environment
- Have a reduced impact on the increasingly scarce world resources and be a better custodian of the environment, both within the vineyard and beyond.
